

Baltimore Tax Shift Endorsement Form

I/We support shifting taxes OFF of homes and other buildings, wages, and production of needed goods and services, and ONTO the accurately assessed value of land. This approach to public finance discourages land speculation and hoarding. It reduces or eliminates the tax penalty for constructing, improving and maintaining buildings. It increases employment, purchasing capacity, affordable housing, and the numbers of small, locally owned businesses. This tax shift will yield an overall revitalization of Baltimore neighborhoods, as has happened elsewhere when taxes were shifted in this direction.

I/We understand that the proposal for a gradual shift during a five-to-ten year period begins with property tax reform. Most homeowners pay less in property tax with the Tax Shift. It is also our intent to maintain and strengthen safeguards for low-income home owners.

Individual Endorsement

Name (print) _____

Signature _____

Address: Street _____ City _____ Postal code _____
